

Research Centre	Centre for Next Generation Localisation
Post Title	Postdoctoral Researcher Information Retrieval
Level on Framework	Level 1
Post Duration	32 Months

Background & Role

The Khresmoi project aims to build systems for multilingual multimodal search and access for biomedical information sources. We are seeking a Postdoctoral level Researcher to work in the area of cross-language information retrieval. This position will focus on technology and system evaluation, algorithm development and human-computer interaction methods to support to cross-language information access in the Khresmoi project. Suitable candidates will have doctoral or equivalent level experiences of evaluation and algorithmic techniques in information retrieval or user search information needs.

As part of this role the researcher will be required to participate in the DCU Research Career Framework. This framework is designed to provide significant professional development opportunities to Researchers and offer the best opportunities in terms of a wider career path. This role is aligned to **Level 1** of the Research Career Framework. For further details regarding the DCU Research Career Framework please refer to www.dcu.ie

Minimum Criteria

Applicants should have a PhD in Information Retrieval or a related area. In addition, it is desirable that the candidate has experience of research into the design and conduct of evaluation of information retrieval systems.

Salary: €7,750 - €16,255

Closing date: 11th October 2011
