

## **New in 2010! MSc in Translation Technology**

The School of Applied Language and Intercultural Studies is pleased to announce the launch of a new one-year, full-time pathway through the existing Master's in Translation which will lead to the award of an MSc in Translation Technology.

### ***Who is it for?***

- Translators with limited or no experience in translation technology, such as translation memory tools, machine translation, software localisation, audiovisual translation.
- People who would like to get a qualification in translation, but whose languages are not offered on the existing [MA in Translation Studies](#) (e.g. speakers of Italian, Polish, Romanian, Portuguese, Chinese, etc.)

### ***Typical subjects taught (subject to confirmation)***

- Translation Technology
- Computerised Terminology
- Software Localisation
- Audiovisual Translation
- Corpus Linguistics
- Translation Theory
- Research Methods
- Introduction to Computer Programming

### ***Do I have to have IT skills to do this programme?***

No, you do not have to be an IT wizard to take this programme. You should be interested in technology and in how it can help practising translators. You should have basic IT skills (e.g. some word processing skills, know how to use e-mail, search the Internet etc.), but that's it!

### ***For further information***
