Airmedia Control Panel

To start the control panel, press the start button on the top right.

The system takes a few moments to warm up.

It is possible to control lights in some rooms through the light button. You can turn all light on, all lights off or just the lights at the front of the room.

You can control the volume from the control panel also, by pressing the up arrow to increase volume, and press down the decrease volume.
Airmedia Control Panel

Each icon represents a different source. Place your finger on the icon of which source you wish to display on the projector.

Drag the icon down to the middle of the control panel, into the viewing section.

Repeat the above actions to select Laptop VGA or Laptop HDMI.
