How To Launch Airmedia

To start the control panel, press the start button on the top right.

The system takes a few moments to warm up.

To activate Airmedia, place your finger on the Airmedia icon.

Then drag it to the centre of the control panel.
How To Launch Airmedia

Now that Airmedia is activated, the next step is to launch the app on your laptop.

This shows the app launched on a Macbook, but the same launch process is followed on a Laptop.

Press yes in the dialogue box to proceed.

You will be promoted to enter IP/Hostname in a Pop-up dialogue box.

Enter the IP address first followed by the code found on the Airmedia home screen which is shown on the projector screen.
