How to Select a Source

To start the control panel, press the start button on the top right.

The system takes a few moments to warm up.

In some rooms there are two projectors. It is possible to control what is displayed on both screens.

Drag the icon you wish to display into one of the viewing sections.
How to Select a Source

Go back to the same icon as before.

Drag the icon down to the other viewing sections to display the same thing on both projectors.

It is also possible to display from two different sources, one on each screen. Simply drag whichever source you wish to display into the left or right projector display sections.

If the audio stops when you change one of the sources, simply tap the source of the audio to resume it.
